§71.300

- (2) Surface mine:
- (i) Producing—normal activity is occurring and coal is being produced or processed or other material or equipment is being handled or moved.
- (ii) Nonproducing—normal activity is not occurring and coal is not being produced or processed, and other material or equipment is not being handled or moved.
- (iii) Abandoned—the work of all miners has been terminated and all activity has ceased.
 - (3) DWP:
- (i) Producing—normal activity is occurring.
- (ii) Nonproducing—normal activity is not occurring.
- (iii) Abandoned—the dust generating source has been withdrawn and activity has ceased.

Subpart D—Respirable Dust Control Plans

AUTHORITY: Secs. 101 and 103(h), Federal Mine Safety and Health Act of 1977, Pub. L. 91–173 as amended by Pub. L. 95–164, 91 Stat. 1291 and 1299 (30 U.S.C. 811 and 813(h)).

Source: 45 FR 80759, Dec. 5, 1980, unless otherwise noted.

§ 71.300 Respirable dust control plan; filing requirements.

- (a) Within 15 calendar days after the termination date of a citation for violation of §71.100 (Respirable dust standard) or §71.101 (Respirable dust standard when quartz is present), the operator shall submit to the District Manager for approval a written respirable dust control plan applicable to the work position identified in the citation. The respirable dust control plan and revisions thereof shall be suitable to the conditions and the mining system of the coal mine and shall be adequate to continuously maintain respirable dust within the permissible concentration at the surface work position identified in the citation.
- (b) Each respirable dust control plan shall include at least the following:
- (1) The mine identification number and designated work position number assigned by MSHA, the operator's name, mine name, mine address, and mine telephone number and the name, address, and telephone number of the principal officer in charge of health and safety at the mine;

- (2) The specific designated work position at the mine to which the plan applies;
- (3) A detailed description of the specific respirable dust control measures used to abate the violation of the respirable dust standard; and
- (4) A detailed description of how each of the respirable dust control measures described in response to paragraph (b)(3) of this section will continue to be used by the operator, including at least the specific time, place and manner the control measures will be used.

§71.301 Respirable dust control plan; approval by District Manager and posting.

- (a) The District Manager will approve respirable dust control plans on a mine-by-mine basis. When approving respirable dust control plans, the District Manager shall consider whether:
- (1) The respirable dust control measures would be likely to maintain compliance with the respirable dust standard: and
- (2) The operator's compliance with all provisions of the respirable dust control plan could be objectively ascertained by MSHA.
- (b) MSHA may take respirable dust samples to determine whether the respirable dust control measures in the operator's plan effectively maintain compliance with the respirable dust standard.
- (c) The operator shall comply with all provisions of each respirable dust control plan upon notice from MSHA that the respirable dust control plan is approved.
- (d) The operator shall post on the mine bulletin board a copy of each current respirable dust control plan approved by the District Manager.
- (e) The operator may review respirable dust control plans and submit proposed revisions to such plans to the District Manager for approval.

EFFECTIVE DATE NOTE: At 79 FR 24985, May 1, 2014, Subpart D was revised, effective Aug. 1, 2014. For the convenience of the user, the revised text is set forth as follows:

Subpart D—Respirable Dust Control Plans

§ 71.300 Respirable dust control plan; filing requirements.

- (a) Within 15 calendar days after the termination date of a citation for violation of the applicable standard, the operator shall submit to the District Manager for approval a written respirable dust control plan applicable to the DWP identified in the citation. The respirable dust control plan and revisions thereof shall be suitable to the conditions and the mining system of the coal mine and shall be adequate to continuously maintain respirable dust to at or below the applicable standard at the DWP identified in the citation.
- (1) The mine operator shall notify the representative of miners at least 5 days prior to submission of a respirable dust control plan and any revision to a dust control plan. If requested, the mine operator shall provide a copy to the representative of miners at the time of notification;
- (2) A copy of the proposed respirable dust control plan, and a copy of any proposed revision, submitted for approval shall be made available for inspection by the representative of miners; and
- (3) A copy of the proposed respirable dust control plan, and a copy of any proposed revision, submitted for approval shall be posted on the mine bulletin board at the time of submittal. The proposed plan or proposed revision shall remain posted until it is approved, withdrawn, or denied.
- (4) Following receipt of the proposed plan or proposed revision, the representative of miners may submit timely comments to the District Manager, in writing, for consideration during the review process. Upon request, a copy of these comments shall be provided to the operator by the District Manager.
- (b) Each respirable dust control plan shall include at least the following:
- (1) The mine identification number and DWP number assigned by MSHA, the operator's name, mine name, mine address, and mine telephone number and the name, address, and telephone number of the principal officer in charge of health and safety at the mine;
- (2) The specific DWP at the mine to which the plan applies;
- (3) A detailed description of the specific respirable dust control measures used to abate the violation of the respirable dust standard; and
- (4) A detailed description of how each of the respirable dust control measures described in response to paragraph (b)(3) of this section will continue to be used by the operator, including at least the specific time, place and manner the control measures will be used.

§ 71.301 Respirable dust control plan; approval by District Manager and posting.

- (a) The District Manager will approve respirable dust control plans on a mine-by-mine basis. When approving respirable dust control plans, the District Manager shall consider whether:
- (1) The respirable dust control measures would be likely to maintain concentrations of respirable coal mine dust at or below the applicable standard; and
- (2) The operator's compliance with all provisions of the respirable dust control plan could be objectively ascertained by MSHA.
- (b) MSHA may take respirable dust samples to determine whether the respirable dust control measures in the operator's plan effectively maintain concentrations of respirable coal mine dust at or below the applicable standard.
- (c) The operator shall comply with all provisions of each respirable dust control plan upon notice from MSHA that the respirable dust control plan is approved.
- (d) The approved respirable dust control plan and any revisions shall be:
- (1) Provided upon request to the representative of miners by the operator following notification of approval;
- (2) Made available for inspection by the representative of miners; and
- (3) Posted on the mine bulletin board within 1 working day following notification of approval, and shall remain posted for the period that the plan is in effect.
- (e) The operator may review respirable dust control plans and submit proposed revisions to such plans to the District Manager for approval.

Subpart E—Surface Bathing Facilities, Change Rooms, and Sanitary Flush Toilet Facilities at Surface Coal Mines

§ 71.400 Bathing facilities; change rooms; sanitary flush toilet facilities.

Each operator of a surface coal mine shall provide bathing facilities, clothing change rooms, and sanitary flush toilet facilities, as hereinafter prescribed, for the use of miners employed in the surface installations and at the surface worksites of such mine. (NOTE: Sanitary facilities at surface work areas of underground mines are subject to the provisions of §75.1712 of this chapter *et seq.*)

§ 71.401 Location of facilities.

Bathhouses, change rooms, and sanitary flush toilet facilities shall be in a
